

## **ATTAINABLE, APPLICABLE AND RETRIEVABLE WHEN SECONDS COUNT....**

**Course Description:** Through-the-Floor Firefighter Rescue

**Session Type:** 4 hour Theory and Hands-on-Training

Changes in building materials and construction techniques over the past several decades have created justifiable concern for operations on or beneath lightweight roof assemblies. We understand the risks of what's on top, but what about what is beneath our feet? Lightweight floor assemblies have been contributing factors in multiple fireground tragedies. The classroom portion of this dynamic and interactive session reviews a few of the tragic losses associated with lightweight floor assemblies, highlights their predominant construction features, and explains the differences between collapse and breakthrough in conventional flooring versus the modern lightweight flooring assemblies. Moving to the hands-on portion, participants will learn the basic techniques associated with providing rapid intervention support to a firefighter who has breached through a lightweight flooring assembly. Training that is attainable, applicable and (perhaps most importantly) retrievable when seconds count....

**DELIVERING PROGRAMS ACROSS THE UNITED STATES AND CANADIAN FIRE SERVICES FOR OVER 20 YEARS, THE DELIVERY METHODS FOR AOYS PROGRAMS ARE TAILORED TO MEET THE NEEDS OF YOUR DEPARTMENT PROVIDING KNOWLEDGE AND SKILLS THAT ARE ATTAINABLE, APPLICABLE AND RETRIEVABLE WHEN SECONDS COUNT...**
